

Products for safe handling of chemical bulk transfers*

Safety Shutdown

Powell is the ONLY manufacturer to offer both electric and pneumatic valve closure systems for container sizes ranging from 150 lb cylinders to 90-ton railcars. Systems can be configured to close valves within 10 seconds or less in the event of a gas leak, car or container movement, security breach, fire alarm, seismic event, or numerous other circumstances.

Safety Breakaway Couplings

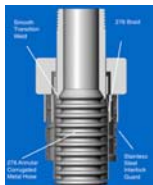

Klaw Products is a global leader in the manufacture and supply of Breakaway Couplings and associated equipment. Providing high quality products for the safe transfer of hazardous and non-hazardous materials, our clients include leading edge global corporates in the chemical, oil, gas, and petrochemicals industries.

Hose/Loading Arm Couplings

HiLoSeal Technologies product transfer couplings are designed for tool free connections of bulk transfer hoses and loading/unloading arms to mobile bulk containers. The patented seal uses a low cost O-ring with NO metal to metal contact to provide zero leakage at Hi or Lo pressures without need for hammers or wrenches.

ChlorSafe™ Chlorine Bulk Transfer Hose

Hose Master has revolutionized the metal hose industry with the safest chlorine transfer hose assemblies available. CHLORSAFE™ is engineer to meet the stringent demands of Chlorine bulk transfer applications. All hoses are 100% HASTELLOY C276 and meet Chlorine Institute Pamphlet 6, Appendix A, Ed. 16.

HazChem Bellows Sealed Globe Valves

Shaw Valves manufactures a full range of Bellows Sealed Globe Valves made specifically for Liquid and Gaseous Chlorine Service. CHEMFLOW stocks 1/2" to 6" valves in ANSI 150# and 300# pressure classes. Body styles include straight pattern, angle pattern and y-pattern. On/Off or Modulating Control Valves are available.

HazChem Ball Valves

Delivery From Stock! CHEMFLOW has Chlorine Prepared Ball Valves in stock in sizes 1/2" to 3" and in pressure classes 150# and 300#. Habonim Ball Valves have the Patented "HermetiX® Stem Seal for Zero Emissions. Available in Manual, Automated On/Off or Control Valve configurations.
